RE: Prescription Drugs

Helen - Noted below is the definition of prescription drugs as we use in the other Government Policies:

Prescription Drugs - They are those medicines that are obtained only by a doctor's written prescription and which must be assigned a number and dispensed by a registered pharmacist. Receipts for these drugs must be on regular pharmacy billing form (not cash register receipts) and show patient's name, prescription number, price, date and doctor's name who ordered the drug.
